

CLAIMS

1. An aqueous solution preparation comprising an aminoglycoside antibiotic or its pharmacologically acceptable
5 salt and bromfenac or its pharmacologically acceptable salt.

2. The aqueous solution preparation according to claim
1, further comprising at least one compound selected from the
group consisting of citric acid or its pharmacologically
10 acceptable salt, monoethanolamine or its pharmacologically
acceptable salt, N-methylglucamine or its pharmacologically
acceptable salt, and nicotinamide.

3. The aqueous solution preparation according to claim
15 2, wherein the pH of said preparation is within a range of 7.0
to 8.5.

4. The aqueous solution preparation according to claim
1, further comprising at least one compound selected from the
20 group consisting of a nonionic water-soluble polymer and a
nonionic surfactant.

5. The aqueous solution preparation according to claim
4, wherein the pH of said preparation is within a range of 6.0
25 to 8.5.

6. The aqueous solution preparation according to any one
of claims 1 to 5, wherein the aminoglycoside antibiotic is
tobramycin or gentamicin.

7. The aqueous solution preparation according to any one of claims 1 to 5, wherein the concentration of the aminoglycoside antibiotic or its pharmacologically acceptable salt in the aqueous solution preparation is within a range from a minimum of 0.01 w/v% to a maximum of 35.0 w/v%, and the concentration of the bromfenac or its pharmacologically acceptable salt in the aqueous solution preparation is within a range from a minimum of 0.01 w/v% to a maximum of 0.5 w/v%.

10

8. The aqueous solution preparation according to any one of claims 1 to 7, which is an eye drop, a nose drop, an ear drop or an injection.
